ABOUT GOGREEN

GoGreen is going to be the leading company in future and this will work by the franchisee module to encourage the upcoming entrepreneur. Our GoGreen team will make India Green & Clean

VISION

We aspire to become the preferred choice for all electric vehicle users. By 2032, we aim to establish 100,000 points across India, which will include over 17,500+ electric vehicle charging stations & units. Our extensive network will ensure convenient and reliable access to charging facilities, promoting the widespread adoption of electric vehicles.

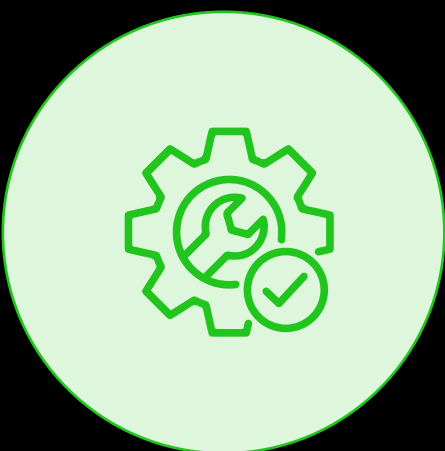

MISSION

GOGREEN is dedicated to become the leading company in the electric vehicle industry. Our growth strategy is based on a robust franchise model that encourages and supports aspiring entrepreneurs. By providing opportunities for new business owners, we foster innovation and expansion within the industry. Our mission extends beyond business success: we are committed to contribute a greener and cleaner India. Through our efforts, we aim to reduce carbon emissions, promote sustainable energy, and enhance the quality of life for future generations.
